Attachment 1

Details on interest rates for housing loans and general purpose loans with residential properties as collateral are as follows:

- The floating rate (MRR) plus maximum spread are determined as follows:

Collateral Type	Floating Rate Plus Maximum Spread
- single houses, twin houses, townhouses and condominiums	MRR per annum
- shop house/home office for both commercial and residential purposes with credit limits not exceeding 75% of appraisal values.	MRR plus 1.00% per annum
- land (the Bank reserves the right to consider on a case by case basis.)	MRR plus 2.00% per annum

- The Bank will calculate monthly installment for debt repayment based on the contractual interest rate plus not exceed 1.00% per annum, i.e.
 1. For a 10-year loan with a credit limit of THB 500,000 and a contractual interest rate of MRR (MRR is equal to 7.95% per annum), the Bank will use the interest rate of 8.95% per annum to calculate the monthly installment for debt repayment. As a result, the monthly installment for debt repayment is equal to $500,000 \times 0.012641 = \text{THB } 6,320.27$ or approximately THB 6,400.
 2. For a 15-year loan with a credit limit of THB 500,000 and a contractual interest rate of MRR + 1.00% per annum (MRR is equal to 7.95% per annum), the Bank will use the interest rate of 9.95% per annum to calculate the monthly installment for debt repayment. As a result, the monthly installment for debt repayment is equal to $500,000 \times 0.010715 = \text{THB } 5,357.74$ or approximately THB 5,400.
- The Table of Estimated Monthly Installments for Debt Repayment is as follows:

Year	Percentage per annum	5.200	5.450	5.700	5.950	6.200	6.450	6.700	6.950	7.200	7.450	7.700	7.950	8.200	8.450	8.700	8.950	9.200	9.450	9.700	9.950	10.200	10.450	10.700

Details on interest rates for housing loans and general purpose loans with residential properties as collateral are as follows:

- The floating rate (MLR) plus maximum spread are determined as follows:

Collateral Type	Floating Rate Plus Maximum Spread
- single houses, twin houses, townhouses and condominiums	MLR per annum
- shop house/home office for both commercial and residential purposes with credit limits not exceeding 75% of appraisal values.	MLR plus 1.00% per annum
- land (the Bank reserves the right to consider on a case by case basis.)	MLR plus 2.00% per annum

- The Bank will calculate monthly installment for debt repayment based on the contractual interest rate plus not exceed 1.00% per annum, i.e.
 1. For a 10-year loan with a credit limit of THB 500,000 and a contractual interest rate of MLR (MLR is equal to 6.85% per annum), the Bank will use the interest rate of 7.85% per annum to calculate the monthly installment for debt repayment. As a result, the monthly installment for debt repayment is equal to $500,000 \times 0.012054 = \text{THB } 6,026.82$ or approximately THB 6,100.
 2. For a 15-year loan with a credit limit of THB 500,000 and a contractual interest rate of MLR + 1.00% per annum (MLR is equal to 6.85% per annum), the Bank will use the interest rate of 8.85% per annum to calculate the monthly installment for debt repayment. As a result, the monthly installment for debt repayment is equal to $500,000 \times 0.010054 = \text{THB } 5,026.81$ or approximately THB 5,100.

- The Table of Estimated Monthly Installments for Debt Repayment is as follows:

Year	Percentage per annum	5.100	5.350	5.600	5.850	6.100	6.350	6.600	6.850	7.100	7.350	7.600	7.850	8.100	8.350	8.600	8.850	9.100	9.350	9.600	9.850	10.100	10.350	10.600
