Attachment

Details on interest rates for housing loans and general purpose loans with residential properties as collateral are as follows:

- The floating rate (MLR) plus maximum spread are determined as follows:

Collateral Type	Floating Rate Plus Maximum Spread
- single houses, twin houses, townhouses and condominiums	MLR per annum
- shop house/home office for both commercial and residential purposes with credit limits not exceeding 75% of appraisal values.	MLR plus 1.00% per annum
- land (the Bank reserves the right to consider on a case by case basis.)	MLR plus 2.00% per annum

- The Bank will calculate monthly installment for debt repayment based on the contractual interest rate plus 1.00% per annum, i.e.
 1. For a 10-year loan with a credit limit of THB 500,000 and a contractual interest rate of MLR (MLR is equal to 7.25% per annum), the Bank will use the interest rate of 8.25% per annum to calculate the monthly installment for debt repayment. As a result, the monthly installment for debt repayment is equal to $500,000 \times 0.012265 = \text{THB } 6,132.50$ or approximately THB 6,200.
 2. For a 15-year loan with a credit limit of THB 500,000 and a contractual interest rate of MLR + 1.00% per annum (MLR is equal to 7.25% per annum), the Bank will use the interest rate of 9.25% per annum to calculate the monthly installment for debt repayment. As a result, the monthly installment for debt repayment is equal to $500,000 \times 0.010292 = \text{THB } 5,146.00$ or approximately THB 5,200.

- The Table of Estimated Monthly Installments for Debt Repayment is as follows:
