Executive Summary:

In 1Q/17, net profit of Baht 5,645 million was achieved, representing a notable 9.5% increase from 4Q/16, and a 9.6% increase from 1Q/16. This quarterly record of net profit was delivered amid the seasonality impact generated from repayments of loans by customers. Underlining the robust results in 1Q/17 were the solid performances in both net interest income and non-interest income.

Total **loans** stood at Baht 1,432,039 million, a decrease of Baht 16,843 million, or 1.2% from December 2016. The loan contraction in 1Q/17 resulted from repayments of corporate working capital lines and seasonally lower retail spending for credit cards and personal loans. Meanwhile, auto hire purchase and mortgage segments continued to expand.

Deposits totaled Baht 1,125,464 million, an increase of Baht 17,176 million, or 1.5%, from December 2016, mainly resulting from an increase in time deposits.

Non-interest income increased by 4.3% quarter-on-quarter, mainly driven by an increase in auto hire-purchase fees, wealth & fund management and securities-related fees, and gain on investment.

Non-performing loans stood at 2.33% in March 2017.

Meanwhile, our **total provision** stood at Baht 51,687 million, with an excess provision over the Bank of Thailand's reserve requirements of Baht 16,778 million, representing 148.1% of the Bank of Thailand's reserving requirements. Concurrently, the loan loss coverage ratio was strong at 143.0%.

Earnings per share (EPS) was Baht 0.77 in 1Q/17.

While the economic growth momentum continued in 1Q/17, we expect the momentum to gain further traction in the latter part of the year, supported by an acceleration in government spending, robust growth in the tourism sector, and improved export outlook. Driven by improving agricultural prices and lowering household leverages, an expansion in consumption is also expected. Under this outlook, we maintain our GDP forecast of 3.3% which contributes to a broad-based loan growth in the range of 6-8% for 2017.

As of March 31, 2017, total loans stood at Baht 1,432,039 million, a decrease of Baht 16,843 million, or 1.2% from December 2016. The loan contraction in 1Q/17 was a result of seasonality repayment of corporate working capital lines and seasonally lower retail spending on credit cards and personal loans.

Corporate loans contracted by 2.8%, driven largely by the seasonality impact of working capital repayments for Thai corporates. Meanwhile, an expansion in international corporate loans mirrored an improvement in global economic sentiment and outlook.

The **SME's** portfolio decreased by 3.1% during 1Q/17. The contraction in SME growth was driven by retail-sized SMEs. Meanwhile, supported by Krungsri's products and programs, medium and small-sized SMEs portfolio registered moderate growth.

The **retail segment** recorded an expansion of 1.0% in 1Q/17 or an increase of Baht 6,483 million. The retail loan growth was largely attributed to growth in auto hire purchase and mortgage segments. Meanwhile, the contraction in credit card and personal loans was largely attributed to seasonally lower spending together with repayment patterns from spending during the festive season in 4Q/16.

Auto hire purchase loans grew by 2.9% in 1Q/17, reflecting an improvement in domestic car sales. The growth was underpinned by both new and used car volumes, underlying our firm relationships with partners and robust auto business franchise.

Mortgage loans grew by 2.0% during the quarter, particularly driven by new projects launched in 1Q/17 by our key developer partners. Meanwhile, the low interest rate environment remained supportive for homebuyers' decision.

Credit cards and personal loans contracted by 4.3% in 1Q/17, driven mainly by seasonally lower spending patterns and normal repayments, following significant growth at 8.6% in the previous quarter.

As at end 1Q/17, commercial lending, comprising corporate and SME customers, accounted for 55% of total loan portfolio, while retail lending represented the remaining 45%.

While the economic growth momentum continued in 1Q/17, we expect the momentum to gain further traction in the latter part of the year, supported by an acceleration in government spending, robust growth in the tourism sector, and improved export outlook. Driven by improving agricultural prices and lowering household leverages, an expansion in consumption is also expected. Under this outlook, we maintain our GDP forecast of 3.3% which contributes to a broad-based loan growth in the range of 6-8% for 2017.
