Executive Summary:

Amid continuing global uncertainty paired with the rapid appreciation of the Thai Baht, the Krungsri Group still **delivered a loan growth of 0.9%, with a record quarterly net profit of Baht 4.1 billion for the first quarter of 2013.**

On a gross loan basis, total loans stood at Baht 837,237 million, an increase of Baht 7,229 million, or 0.9%, from December 2012. The loan growth in 1Q/13 was mainly driven by the retail segment, which recorded growth at 3.8%, while SME remained flat and corporate loans contracted due to repayment in working capital related loans.

The loan growth in 1Q/13 was significant given the slower growth often experienced in the first quarter due to seasonality, particularly in the retail segment. In addition, the 0.9% growth booked in the first quarter was on the back of the strong growth of 5.9% recorded in 4Q/12.

Notwithstanding the seasonality effect on loan growth in 1Q/13, net profit grew to Baht 4,072 million, representing an 8.4% increase on a quarter-on-quarter basis, and an 18.3% increase on a year-on-year basis. Key drivers to this strong delivery included higher net interest income resulting from lower interest expense and a healthy fee and service income growth, in particular in fees from Bancassurance and Wealth and Fund Management.

Earnings per share (EPS) rose to Baht 0.67 in 1Q/13 from Baht 0.62 in the prior quarter, an impressive 7.8% increase.

As of March 31, 2013, non-performing loans represented 2.38% of total loans, compared to 2.39% in December 2012.

Deposits totaled Baht 702,449 million, an increase of Baht 15,290 million, or 2.2%, from December 2012. The strong growth in deposits was the result of our Big Bang products – “Mee Tae Dai and Jad Hai” launched in 2012, and the progressive shift from higher cost borrowings to deposits. At the end of March 2013, “Mee Tai Dai” recorded more than Baht 163,000 million, an increase of Baht 13,000 million from December 2012; meanwhile, “Jad Hai” registered more than 300,000 accounts, an increase of 100,000 accounts, or 50%, from December 2012. As a result, the proportion of savings and current deposits (CASA) as a percentage of total deposits increased to 55.9%, compared to 53.8% in December 2012.

The outlook for the remainder of 2013 remains strong and is expected to be supported by an accommodative monetary policy, government investment projects and further stimulus spending. Investment from renewed capital expenditure cycles and healthy consumer demand will be the key drivers of growth. Krungsri should sustain the robust position and continue to grow strongly, with the projected loan growth of more than 12% for 2013.

On a quarter-on-quarter basis, net interest income in 1Q/13 was Baht 10,602 million, representing an increase of Baht 302 million, or 2.9%, attributed to higher interest income and lower interest expense. An increase of interest income was underscored by robust loan growth in auto hire purchase. Notwithstanding the higher volume of deposits, interest expense decreased by Baht 82 million, or 1.3%, attributed to the improvement in funding costs driven by the progressive shift from higher cost borrowings to the special saving products (“Mee Tae Dai and Jad Hai”).

On a year-on-year basis, net interest income increased by Baht 1,222 million, or 13.0%, mainly due to performing loan growth of 14.2%. Interest expense increased mainly from the increase in deposit costs as a result of higher volume of deposits to support business growth, and the increase in fee contributions to FIDF.

In 1Q/13, NIM stood at 4.28%, slightly moderated from 4.30% in the prior quarter, reflecting the seasonality impact on our loan portfolio structure. Higher yield loans, in particular credit cards and personal loans, typically contract after the year-end holiday spending in the fourth quarter. As a result, Krungsri's overall yield moderated slightly to 6.84% in 1Q/13 from 6.96% recorded in 4Q/12. Yet, there was only a modest impact on NIM, underscored by the strong improvement in the cost of funds, which improved from 2.93% in 4Q/12 to 2.82% in 1Q/13.

Fees from Bancassurance grew strongly at 17.6% in the first quarter of 2013. Meanwhile, wealth, fund management and security fees improved 53.7%, in part attributed to the robust growth in asset under management and favorable capital market conditions. On a quarter-on-quarter basis, fees and service expense increased 3.6%, mainly due to an increase in variable expenses relating to the fees growth in Bancassurance and wealth and fund management. In particular, fees relating to wealth and fund management products grew 75.7%.

On a year-on-year basis, net fees and service income increased 25.6%, driven by the increase in fees from wealth, fund management and security fees (an increase of 53.7%), auto hire purchase (an increase of 31.6%), card businesses (an increase of 25.9%), and Bancassurance (an increase of 13.9%).

As at March 31, 2013, total outstanding loans stood at Baht 837,237 million, an increase of Baht 7,229 million, or 0.9%.

The **retail segment** recorded favorable growth, with an increase of Baht 15,523 million, or 3.8%, attributed to a strong expansion in auto hire purchase loans and, in part, mortgage loans.

Auto hire purchase loans grew strongly at 7.6% in 1Q/13. The strong growth was underpinned by healthy demand and delivery of cars under the first time buyer program that was offered in 2012.

Housing loans grew 2.8% during the quarter, driven by both positive economic development and favorable developments in the residential market.

In line with the industry's current development¹, credit cards and personal loans contracted by 2.6% in 1Q/2013. The contraction in credit card and personal loans was a result of annual product seasonality.

Driven largely by working capital repayments, corporate loans contracted by 4%, while SME loans remained flat in 1Q/13.

In sum, the loan growth in 1Q/13 was satisfactory, given the slower growth often observed in the first quarter due to business seasonality. In addition, the 0.9% growth booked in the first quarter was on the back of strong growth of 5.9% recorded in 4Q/12.

The outlook for the remainder of 2013 remains strong and is expected to be supported by an accommodative monetary policy, government investment projects and further stimulus spending. Investment from renewed capital expenditure cycles and healthy consumer demand will be the key drivers of growth. Krungsri should sustain the robust position and continue to grow strongly, with the projected loan growth of more than 12% in 2013.

As at March 31, 2013, overall funding for the Bank including deposits, bills of exchange and debentures increased Baht 4,342 million, or 0.5%, from December 2012.

Deposits totaled Baht 702,449 million, an increase of Baht 15,290 million, or 2.2%, from December 2012. The strong growth in deposit was the result of our Big Bang products – “Mee Tae Dai and Jad Hai” launched in 2012, and the progressive shift from higher cost borrowings to deposit products. At the end of March 2013, “Mee Tae Dai” recorded more than Baht 163,000 million, an increase of Baht 13,000 million from December 2012; meanwhile, “Jad Hai” registered more than 300,000 accounts, an increase of 100,000 accounts, or 50%, from December 2012. As a result, the proportion of savings and current deposits (CASA) as a percentage of total deposits increased to 55.9%, compared to 53.8% as of December 2012.

Bills of exchange (B/E) totaled Baht 51,670 million, an increase of Baht 3,147 million, or 6.5% from December 2012, driven largely by the issuances of B/E by Krungsri’s subsidiary.

Consequently, the loan to deposit ratio improved slightly to 119% and the loan to deposit plus B/E and debentures ratio remained at 103%.

3.5 Statutory Capital

Effective in January 2013, the BIS ratio is calculated under Basel III guidance as prescribed by the Bank of Thailand. A modest impact was observed in the Tier 2 capital due to the rule governing the qualification of subordinate debentures, which will be gradually amortized over time.
